

Introducing ADE Solutions

Solutions: The Future of Behavioral Health

Powered by ADE Incorporated

ADE Solutions

ADE Solutions is a website that offers a wide variety of assessments and educational tools on many different topics. Everything is completely online, and nothing needs to be downloaded to run our assessments.

Assessments

ADE Solutions offers a wide variety of assessments addressing behavioral health issues, including substance use, gambling, mental health, and other areas of concern.

If you are interested in having your clients take an assessment but aren't interested in your own database, ADE Solutions is a perfect option. Simply look on the other side of this brochure for a list of assessments and their Codes of URLs. This code would be entered after the website URL. For example: <https://ade.solutions/mhss> would go directly to the Marijuana History and Severity Scale.

Education

To learn about the various education tools available on ADE Solutions, go to ade.solutions/education.html

Solutions Pro

SolutionsPro is a new professional software tool, allowing professionals to administer surveys and receive results directly. All of the evaluations available on ADE Solutions will also be available in SolutionsPro.

Users are able to administer a wide variety of assessments to clients interactively on a desktop or mobile device. This can be done by staging a survey, which will send an email or SMS to the client with a link to their assessment, or by directing the client to a dedicated URL based on your database.

Regardless of process, once completed, the assessment results will be available in the user's SolutionsPro database.

In addition to this extensive list of assessments, SolutionsPro can be COMPLETELY FREE for you to use. There is an option for both staged and client-initiated surveys for them to be paid for by the client instead of by you. If you choose to do this, you will never be billed for an assessment from ADE. And the database is ALWAYS free to use.

MyPrime® in Solutions Pro

What is myPrime?

myPRIME® is an online version of PRIME For Life®. PRIME For Life® is an evidence-based, motivational prevention, intervention and pretreatment program specifically designed for anyone (e.g., impaired driving offenders, college students, young people) who might be making high-risk choices. The National Registry of Evidenced-based Programs and Practices (NREPP) lists PRIME For Life® as an evidence-based program.

The Three myPrime Units

You can have your client stop at the end of any unit and print the certificate.

The Exploring Unit helps people understand who has risk for alcohol and drug problems, how problems develop and low-risk guidelines for preventing problems.

The Reflecting Unit helps people understand the Phases of Alcohol and Drug Use and where they fall along the low-risk or high-risk paths.

The Protecting Unit helps people put a plan together and enact steps to protect what they value most and prevent alcohol and drug problems.

How can I use myPrime?

myPRIME® is available for all SolutionsPro customers. You initiate the course the same way you initiate an assessment and your client will receive an email with a registration link and code. This course costs you \$75, but most programs charge their client \$275, so this can also be a revenue-producer for you.

ADE Solutions Assessments

Assessment	Description	Price*	Code for URL
